WEB 3.0

This is a cloud service using Web 3.0

PROTECTION

*Your data registered in SMARTNAME is protected
by NFT technology and a private blockchain.
EXAMPLE:
Attendance Record,
Personal Data + Associated Data
Qualification Verification (Various Licenses) etc.*

ECOLOGY

*Cards made from recycled paper and
plant–based plastics help support the SDGs.
After the update it will function as a smartphone,
so this is no longer necessary.*

AS AN ID–LINKED KEY

*Combines IDs like **employee**, **member**, and **student cards**
with building access keys.
It also allows management of entry and exit records.
Optional biometric authentication can be enabled.*

PERSONAL INFORMATION–ENABLED ID CARD

(Includes Digital Business Card Functionality)
Information associated with ID cards varies widely!

  *Management of Attendance and Access Control
  Payment at Employee and Student Cafeterias
  ID Card / Digital Business Card
  Management of Facility Usage History and Lending History
  Qualification Management etc.*

*No need to display personal information on the front of the card
EXAMPLE: Issuer Name and Number
Issuing companies and schools securely manage basic
personal information. Impersonation is not allowed!*

SMART NAME

SMART NAME

DEDICATED APP (CURRENTLY UNDER DEVELOPMENT) SOME FEATURES

1 DISTRIBUTION OF DEDICATED APP
